

AMENDMENTS TO THE CLAIMS

1. (Twice Amended) A method for selecting fashion information for an individual comprising the steps of:

providing a style database including complimentary fashion information having cosmetic data and physical characteristic data;

providing a personal characteristic database ~~being~~ adapted to receive physical characteristic data for ~~at least one~~ an individual;

providing an input device operable to capture physical characteristic data about the individual;

capturing with the input device physical characteristic data of the individual;

~~communicating~~ receiving in the personal characteristic database physical characteristic data for at least two physical characteristics for ~~an~~ the individual ~~from an input device to said personal characteristic database;~~

comparing said physical characteristic data for ~~said~~ the individual with ~~said~~ the style database to identify ~~a selection of cosmetics~~ complimentary fashion selections that are appropriate for ~~said~~ the individual based upon the ~~at least two physical characteristics communicated to~~ physical characteristic data received in the personal characteristic database; and

identifying for ~~said~~ the individual ~~a selection of cosmetics~~ complimentary fashion selections that are appropriate for the individual based upon the ~~at least two physical characteristics communicated to the~~ physical characteristic data received in the personal characteristic database.

2. (Original) The method of claim 1, wherein said style database further comprises instructional data concerning the proper application of cosmetics.

3. (Original) The method of claim 2, wherein said instructional data comprises a multimedia presentation.

4. (Previously Amended) The method of claim 3, wherein said multimedia presentation comprises a video presentation.

5. (Original) The method of claim 1, wherein said cosmetic data comprises at least one cosmetic characteristic selected from a group consisting of: cosmetic brand, cosmetic style, colors, textures, medicinal qualities or chemical qualities.

6. (Twice Amended) The method of claim 1, wherein said ~~at least two physical characteristics are~~ physical characteristic data is selected from a group consisting of: skin color, skin tone, hair color, eye color, facial shape, body proportions, body measurements.

7. (Original) The method of claim 1, wherein said input device comprises a digital camera.

8. (Currently Amended) The method of claim 1, wherein said input device comprises a ~~and~~ colorimeter.

9. (Currently Amended) The method of claim 1, wherein said input device comprises a spectrophotometer.

10. (Original) The method of claim 1, wherein said input device comprises a computer.

11. (Original) The method of claim 1, wherein said style database further comprises footwear information.

12. (Original) The method of claim 1, wherein said style database further comprises clothing information.

13. (Previously Amended) The method of claim 12, wherein said clothing information includes clothing data selected from a group consisting of: size data, style data, fabric color data and fabric texture data.

14. (Previously Amended) The method of claim 1, wherein said personal characteristic database is accessible via a computer network.

15. (Cancelled)

16. (Currently Amended) A method for providing fashion information for an individual, said method comprising the steps of:

providing a style database having complimentary fashion information;

providing a personal characteristic database being adapted to receive physical characteristic data for an individual;

providing an input device operable to capture physical characteristic data about the individual;

capturing with the input device physical characteristic data of the individual;

~~communicating~~ receiving in the personal characteristic database physical characteristic data for at least two physical characteristics for an individual ~~from an input device to said personal characteristic database;~~

comparing said physical characteristic data for the individual with said style database to identify appropriate fashion selections for said the individual based upon the at least two physical characteristics communicated to the personal characteristic database; and

identifying fashion selections that are appropriate for the individual based upon the at least two physical characteristics communicated to the personal characteristic database.

17. (Previously added) The method of claim 16, wherein the at least two physical characteristics are selected from a group consisting of: skin color, skin tone, hair color, eye color, facial shape, body proportions, body measurements.

18. (Previously added) The method of claim 16, wherein the complimentary fashion information comprises clothing information.

19. (Previously added) The method of claim 18, wherein the clothing information is selected from a group consisting of: clothing size, clothing style, clothing fabric color and clothing fabric texture.

20. (Previously added) The method of claim 16, wherein the complimentary fashion information comprises cosmetic data.

21. (Previously added) The method of claim 19, wherein the complimentary fashion information comprises footwear information.

22. (Previously added) The method of claim 19, wherein said fashion selections are selected from the group consisting of: cosmetic information, clothing information and footwear information.

23. (Previously added) The method of claim 16, wherein said input device comprises a camera.

24. (Previously added) The method of claim 16, wherein said input device comprises and colorimeter.

25. (Previously added) The method of claim 16, wherein said input device comprises spectrophotometer.

26. (Previously added) The method of claim 16, wherein said input device comprises a computer.

27. (New) A method for selecting fashion information for an individual comprising the steps of:

providing a style database including complimentary fashion information having cosmetic data and physical characteristic data;

providing a personal characteristic database adapted to receive physical characteristic data for an individual;

receiving in the style database physical characteristic data for two physical characteristics for the individual;

receiving in the style database a resulted result for the individual;

comparing in the style database the physical characteristic data for the individual with the requested result to identify complimentary fashion selections that achieve the requested result for the individual based upon the received physical characteristic data; and

identifying complimentary fashion selections that achieve the requested result for the individual based upon the received physical characteristic data.

28. (New) The method of claim 27, wherein the complimentary fashion information comprises clothing information.

29. (New) The method of claim 28, wherein the clothing information is selected from a group consisting of: clothing size, clothing style, clothing fabric color and clothing fabric texture.

30. (New) The method of claim 29, wherein the complimentary fashion information comprises cosmetic data.

31. (New) The method of claim 29, wherein the complimentary fashion information comprises footwear information.

32. (New) The method of claim 27, wherein said fashion selections are selected from the group consisting of: cosmetic information, clothing information and footwear information.

33. (New) A method for selecting fashion information for an individual comprising the steps of:

providing a style database including complimentary fashion information;

providing a personal characteristic database adapted to receive physical characteristic data for an individual;

providing an input device operable to capture physical characteristic data about the individual;

capturing with the input device physical characteristic data of the individual;

receiving in the personal characteristic database physical characteristic data for at least two physical characteristics for the individual;

receiving in the style database a requested result for the individual

comparing said physical characteristic data for the individual with the style database to identify complimentary fashion selections that achieve the requested result for the individual based upon the physical characteristic data received in the personal characteristic database; and

identifying for the individual complimentary fashion selections that achieve the requested result for the individual based upon the physical characteristic data received in the personal characteristic database.

34. (Previously added) The method of claim 33, wherein the at least two physical characteristics are selected from a group consisting of: skin color, skin tone, hair color, eye color, facial shape, body proportions, body measurements.

35. (Previously added) The method of claim 33, wherein the complimentary fashion information comprises clothing information.

36. (Previously added) The method of claim 35, wherein the clothing information is selected from a group consisting of: clothing size, clothing style, clothing fabric color and clothing fabric texture.

37. (Previously added) The method of claim 33, wherein the complimentary fashion information comprises cosmetic data.

38. (Previously added) The method of claim 37, wherein the complimentary fashion information comprises footwear information.

39. (Previously added) The method of claim 37, wherein said fashion selections are selected from the group consisting of: cosmetic information, clothing information and footwear information.

40. (Previously added) The method of claim 33, wherein said input device comprises a camera.

41. (Previously added) The method of claim 33, wherein said input device comprises and colorimeter.

42. (Previously added) The method of claim 33, wherein said input device comprises spectrophotometer.

Serial No. 09/910,520
Reply to Office Action of July 9, 2004

43. (Previously added) The method of claim 33, wherein said input device comprises a computer.
